In 2008 CLINAM created the European Journal of Nanomedicine (EJNM) which was published by De Gruyter in Berlin. Profs. Patrick Hunziker and Jan Mollenhauer were the Editor-in-Chiefs, Dr. Beat Löffler and Dr. Georgette B. Salieb-Beugelaar were the Scientific and Managing Editors of EJNM, respectively. Topics were clinically translatable innovative preventions, diagnostics, and therapies for major and neglected human diseases. The journal addressed interest of scientists in chemistry, physics, engineering, pharmacology, molecular biology, biomedicine, medicine and clinicians. It was aimed at people in academic, industrial, and regulatory environments, as well as at the informed public and policymakers.

Realizing that the interdisciplinary science and technology of nanomedicine is moving towards personalized medicine, the Summit in 2018 assigned an important session to the topic of Precision Medicine. Meanwhile, the CLINAM foundation established a strong cooperation with another publisher, Andover House, Inc (https://andoverhouse.org) in the USA. The experienced and successful Editor-in-Chief, Prof. Dr. Lajos Balogh (formerly EiC of the Nanomedicine: Nanotechnology, Biology, and Medicine journal from 2008 until 2016), agreed to be the Editor-in-Chief of the newly launched online journal Precision Nanomedicine, which is now the official Journal of CLINAM.

Precision Nanomedicine (PRNANO) is a community-driven, open access, not-for-profit, and peer-reviewed international journal that promotes all practical, rational and progressive aspects of nanomedicine including basic science, translational, and clinical research as well as commercialization. Authors are invited to submit both original and replication studies, while discussions of negative results are also welcome. The journal enjoys the support of a prestigious Editorial Board and experienced Associate Editors.

SUBMISSIONS ARE FREE - NO APC IN 2019
